4th Workshop on Health IT and Economics (WHITE), November 15-16, 2013

What: We build an information system that enables pharmacists to guide patients throughout their therapies Health | IS

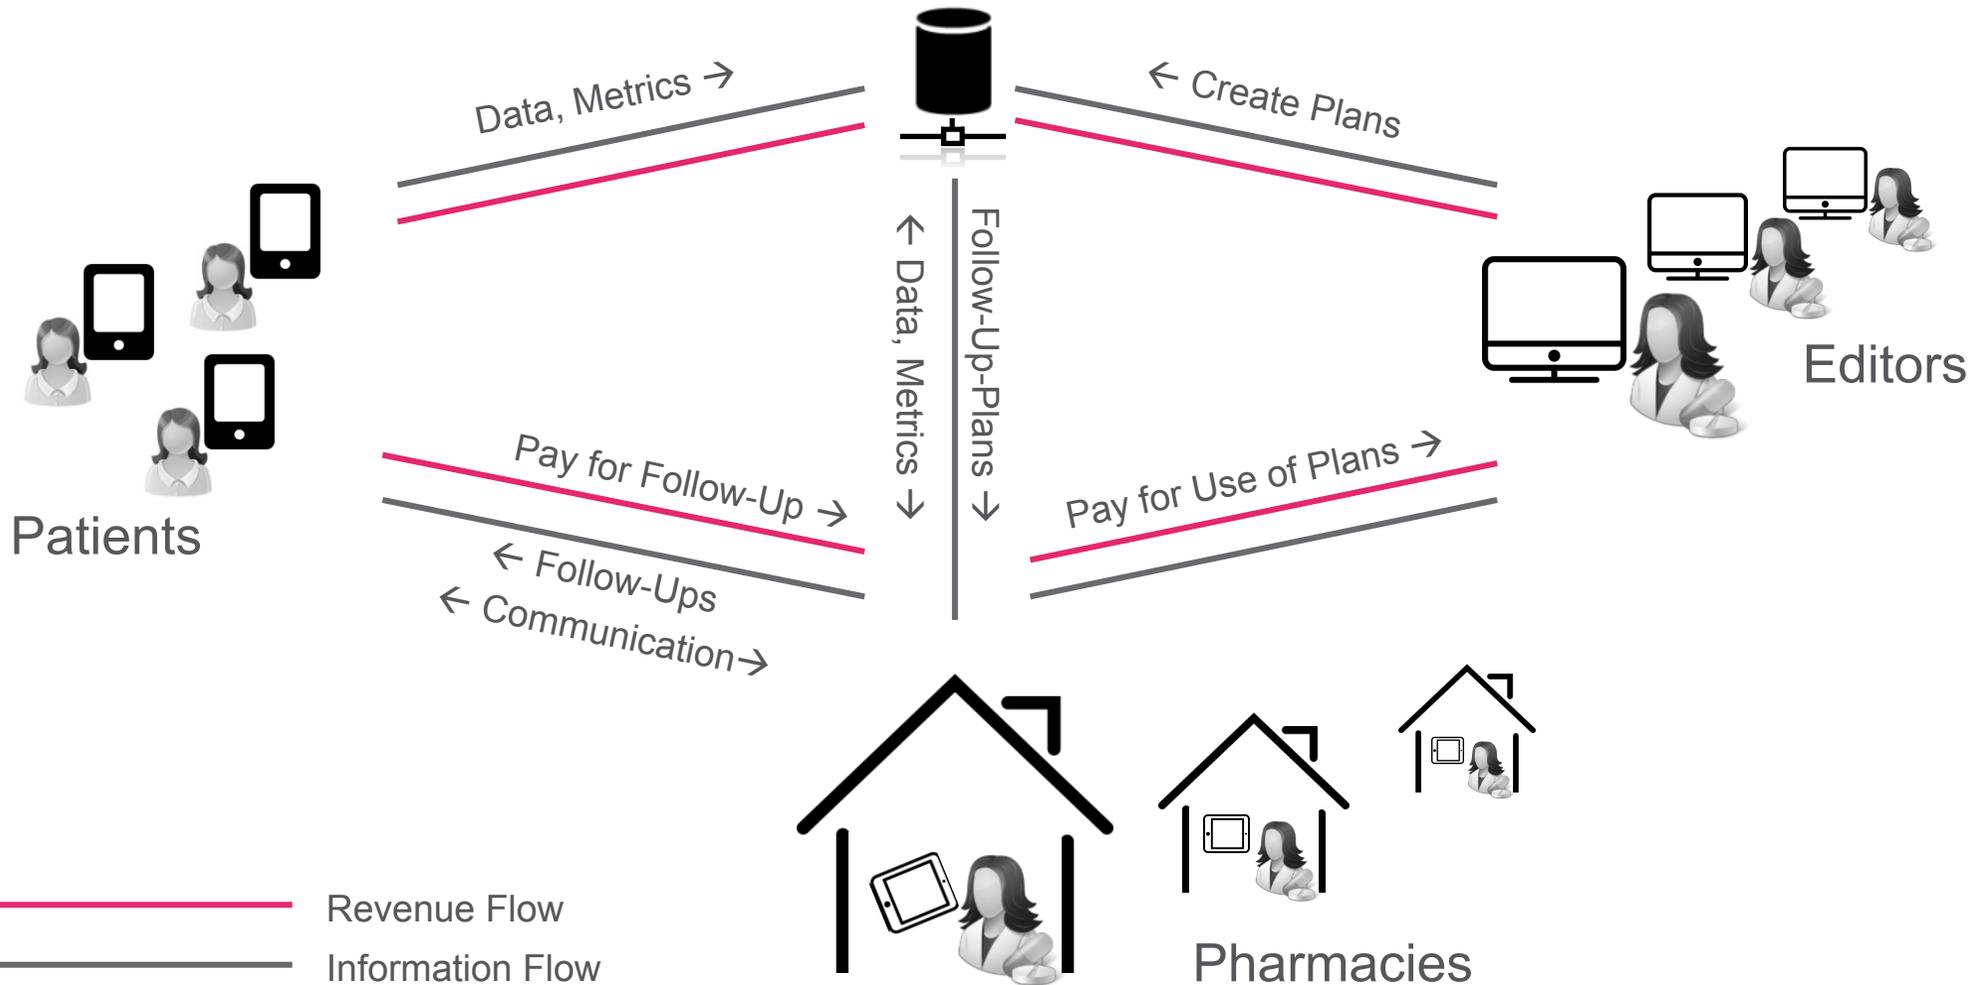

Why: There is a **fundamental asymmetry** of being on “the inside” or “the outside” of healthcare institutions.

How: Design Research Approach

21 Swiss Pharmacies

Genre Analysis

The pharmacist instantiates a **follow-up** during the face2face encounter with the patient.

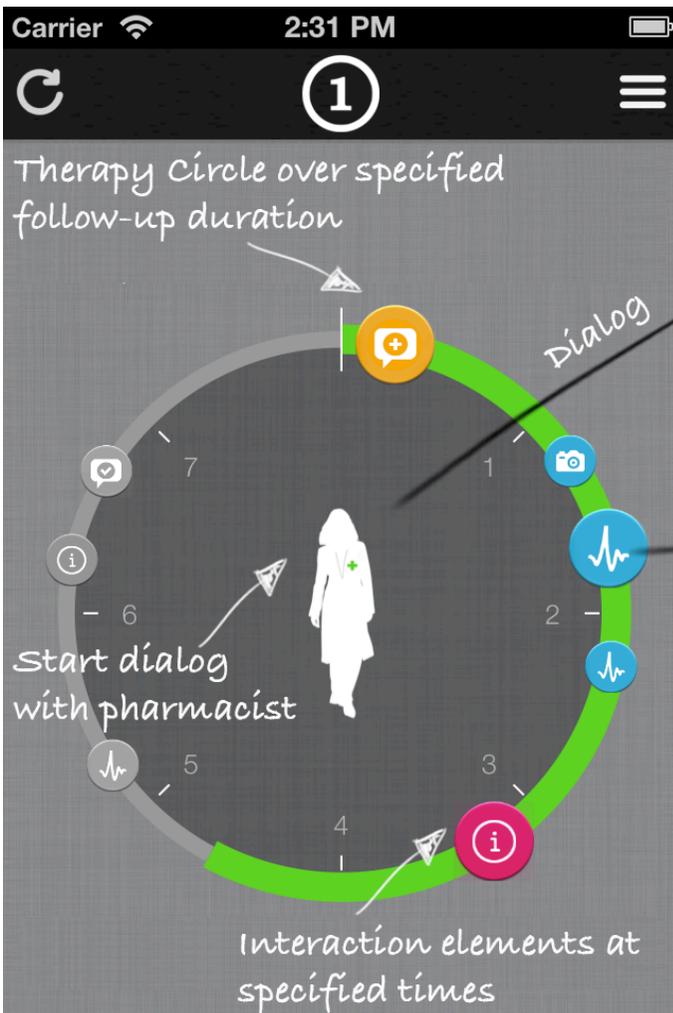

The screenshot shows a mobile application interface for a pharmacist. At the top, there's a status bar with 'Carrier', '2:34 PM', and '100%' battery. Below that, a search bar with 'Suchen' and a date '10/08 14:33'. The main content area is divided into several sections:

- Header:** A navigation bar with four buttons: '+ Aktion', 'Dialog', '+ Termin', and '+ Begleitung'. The '+ Begleitung' button is circled in red.
- Patient Profile:** 'Mustermann, Max', 'Alter: 31-40', 'Geschlecht: Mann', 'Mobil: 0791234567', 'Begleitung: Frau Mittag', 'Code: 743001'. A 'Dialog' icon is next to the profile.
- Follow-up Plan:** A grid of follow-up items. The first item is 'Fortschrittskontrolle' with a value of 'n/a' and a date of '11.08.'. The second item is 'Erfolgskontrolle' with a value of 'n/a' and a date of '16.08.'. There are also dates '12.08.' and '13.08.' visible.
- Dialog Window:** A central window titled 'Dialog' showing a conversation with the patient. It includes a message: 'Fortschrittskontrolle gesendet 5.0 von 10' and a question: 'Kann ich die Creme auch dicker auftragen? Es juckt sehr stark.' Below this is a response: 'Liebe Kundin, sie können die Creme auch 2x am Tag auftragen, dass würde mehr'. There's a 'Photo' section with a photo of a hand.
- Bottom List:** A list of other patients: 'Mustermann, Erika' and 'Muster, Max'. A note indicates they can be filtered and sorted.

Handwritten annotations in black ink provide additional context:

- 'add new patient follow-up' with an arrow pointing to the '+ Begleitung' button.
- 'Dialog with the patient. Also interaction elements can be added (like photo or request therapy progress).' with an arrow pointing to the dialog window.
- 'Configured follow-up with interaction elements like therapy progress or photo feedback.' with an arrow pointing to the follow-up items.
- 'Different patients that can be filtered and sorted' with an arrow pointing to the bottom list.

The patient is then **followed up** by the pharmacist with the **specified structure**.
